Pro2

MAX

Affordable Digital Manufacturing for every dental laboratory and clinic.

The world's most advanced digital dental 3D printers offering exceptional productivity in a small footprint. Our 3D printers are optimized for orthodontics, crown & bridge, surgical guides, dental models, custom trays, and partial dentures in lab and clinical environments.

All Asiga printers are open to materials from any supplier for maximum flexibility and economy.

DENTAL TECHNOLOGY SOLUTIONS

WHIP MIX OFFERS YOU THE HIGHEST QUALITY 3D PRINTERS AND RESINS
 BACKED BY A TEAM OF EXPERT PROFESSIONALS FOR SUPERIOR SUPPORT

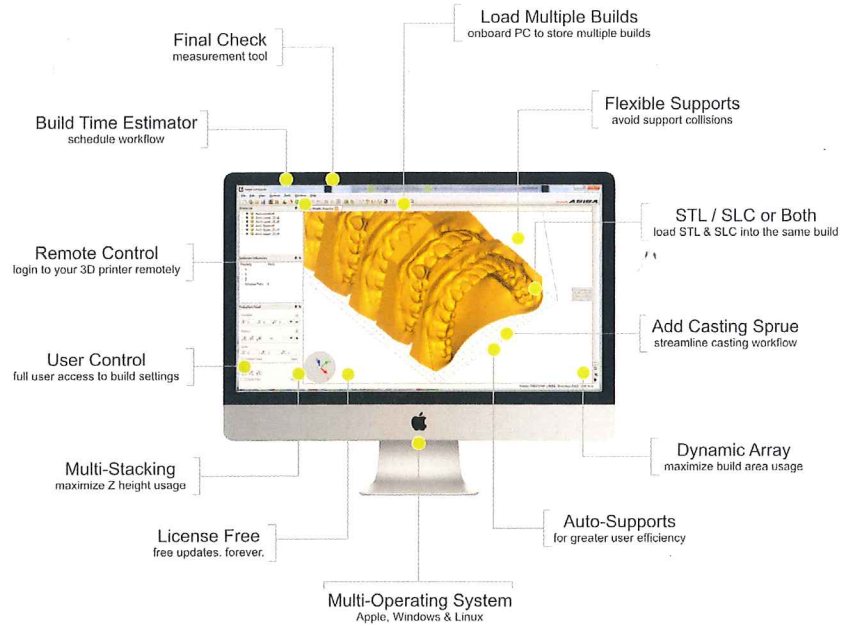

Whip Mix has a full range of VeriBuild® resin materials available for model production, surgical guides, and casting. All of these materials are fully qualified and are available today.

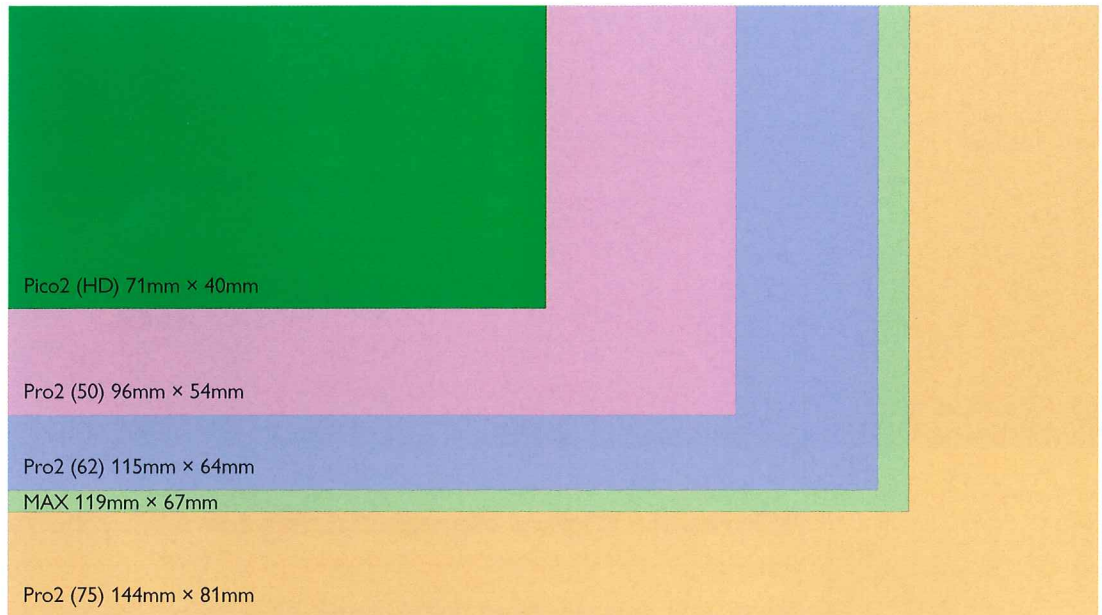

Regardless of build size or light source, all Pro2 printers are priced the same. Any Pro2 can be re-configured for any of the three resolutions offered.

The 405nm light source is multi-purpose. The 385nm (UV) light source may be used for all resins, including those with a high degree of translucency.

FULLY FEATURED SOFTWARE, FOR BOTH MAC AND WINDOWS!
