THE REDEFINITION OF HIGH PRINT SPEED AND PRECISION.

Elevate your dental experience with the Whip Mix® 3D-Printed Custom Impression Tray.

- **Quick 25 minute print time:** Optimize your workflow and minimize chair time.
- **Robust and stable tray:** Can withstand the rigors of dental procedures and ensures high impression material retention.
- **High accuracy:** Improve the patient experience by enhancing restoration fit and minimizing retakes.
- **Transparent turquoise color:** Provides visibility and ensures accurate tray placement.

Designed to print at an exceptional 500 micron layers to redefine the standards of high speed and precision printing, while ensuring durability, and ease of use.

"I had made a couple of trays with Whip Mix VeriTRAY™ resin. I love the color and it prints clean and is easy to adjust" *Dr. Charles Wahl N DMD, Collingswood, NJ*

Performance Metrics

VeriTRAY print times

** Data derived from printing VeriTRAY on Asiga Max 385 with a horizontal orientation and an object height of 3cm.*

Print time comparisons

**Print time is determined based on the Asiga Max 385 printer, utilizing the highest settings specified by the manufacturer for resin slice thickness.*

TRANSPARENT STABLE TRAY

"I didn't mind the rough texture of the 500 microns. We will use the 500 microns from now on" *Brandon Stapleton, DMD, MSD, Prosthodontist, Lexington, KY*
